This tab is only visible if you created PowerMic as a source of dictation for your user profile and it is connected to your computer. The settings on this tab only affect how PowerMic works with your user profile. Other user profiles are not affected. App-based functionality You can install PowerMic buttons to behave one way when you use PowerMic in a dictation box, and the other way when you use it elsewhere. Because of this, it's important to make sure that you choose one of the following options from the app menu before making any changes: Dictation Box Select this to view and change the settings of the button for the dictation box. Global Select is to view and change button settings for all other purposes. Each button has a default setting that you can override by clicking on the Action menu. Unless otherwise stated, the defaults in the table below are the same for both Global and Dictation Box. The default button command To Transcrib Global: Show Dictation Box Dictation Box: Transfer Text Tab Back Tab Forward Tab Forward Dictatorship Press-to-talkNote: Click and Hold During Conversation. Once you release the button, Dragon continues to record until you stop talking, which may affect your transcribed text. To avoid problems, hold the button until you stop talking and then release it and stay calm for a moment. Rewind the Previous Fast Forward Next Box Stop/Play Accept default Custom Left Global: Power Of the Mind-Feed Box Recognition Command: Click Undo the Enter/Select No Custom Right Force Dictation Recognition Note: If you use PowerMic III, you can assign additional buttons by clicking Extra at the bottom of the tab. For more information, see Reassignment of the Select Action from the list to drop out of the action list to assign a different command to each button. Dragon Group is your choice in the category under multiple substitutions. To reassign the button: Select Global or Dictation Box in the app menu. Select action from the list to drop out of the list for the button you want to change. Choose a substitution and then select a team. Each substitution and its contents are described below. If you're using PowerMic III and want to set up additional buttons, click Additional. This spoof application includes commands to access two important Dragon interfaces. Team Teams The DragonBar Show menu opens with the DragonBar menu being selected. The show dictation box opens the dictation box. Dictation This substitution involves actions to control the dictation session. The command function microphone on/off switches the microphone between off and on. The correction window shows the correction window. The mic sleep/on switches the microphone between On and Sleep mode. Click on the conversation to turn on the microphone when you click, turns off the microphone when released. Note: Once you release the button, Dragon continues to record until you stop talking, which may affect your transcribed text. To avoid problems, hold the button until you stop talking and then release it and stay calm for a moment. Train a new word opens to add a word or phrase to a dialog box. The transcript opens the transcript of the conversational dialog box of the recording. Note: If you haven't created a transcription source for your current user profile, Dragon will tell you to do so first. Text Note Transfer: You only see this command when the app menu is set up on The Dictation Box. Translates the text from the dictation box to the document. Navigating This substitution involves commands to move the cursor, to change which item is selected or has a focus (such as a window, button, or menu), and to perform an item-related activity (such as pressing a button). The Skip Back Functionality Team moves the cursor or focus one step back. Go forward Moves cursor or focus one step ahead. Click OK just like pressing the OK button. Click Cancellation just like pressing the Cancellation button. The forward tab moves the cursor or focus to the next item or field. The previous field moves the cursor to the previous field. The next field moves the cursor to the next field. Accepting the default leaves the default as unchanged for the current field. The back tab moves the cursor or focus on the previous item or field. Recognition Modes This spoof includes commands to change the current recognition mode. The Normal Recognition Force Functionality team switches to dictation mode and commands. (On classic DragonBar, it's called normal mode.) Recognition of force dictation goes into dictation mode. Force command recognition switches to command mode. The recognition of power numbers switches to Numbers mode. Power spell recognition switches to spell mode. Undoing recognition when you click acts as a hot key that stops the dictation recognition process that is in the process. Useful when unexpected noises interfere with dictation, like background noise, phone call, or sneezing. Playing This spoof includes commands to control the sound playback of dictation Play playback audio of the current dictation. Fast playback speeds up sound of the current dictation. Fast forward Advances to audio playback of current dictation. Rewind rewind audio playback of current dictation. User teams use this to select any command available in the command browser to this button. Identify You want to do one of the following: Choose one from the list of newly used commands shown. Click Point out, then tell or enter the command. Make sure the team exists in the team browser. Otherwise, nothing will happen, you press the button. Restore the default settings to reset all items in the default settings, click Recovery by default. Save the Click Changes OK to save the changes. Additional PowerMic Options Options Dialogue Window Nuance Healthcare Administrator Resources PowerMic Mobile User Guide for Dragon Medical One provides additional information for PowerMic Mobile users. If you have additional questions or need support, please contact Nuance technical support as described below. Using PowerMic Mobile with Dragon Medical One Dragon Medical One provides PowerMic Mobile support: tell users to choose PowerMic Mobile from a list of microphones when they log in. PowerMic Mobile virtualized environments do not require any additional components for virtualized environments. If you deploy Dragon Medical One as a virtualized app, users choose PowerMic Mobile from a list of microphones when they log in. Automatic pairing For automatic pairing, log in to PowerMic Mobile and Dragon Medical One (in any order) with the same username. If users can't use the same username for PowerMic Mobile and Dragon Medical One, they'll have to use a hand pairing; For more information, see profiles of a specific configuration of the organization stored on the mobile device as a profile. To set up a profile, give users a configuration link so they can open it on their device; users can either open the link with PowerMic Mobile or copy and paste a link to the PowerMic Mobile Settings screen. Users who work with PowerMic Mobile in several organizations will dial a profile for each of them and select a profile that matches their current organization when they enter. Users don't need to re-submit a configuration link every time they move from one organization to another. Troubleshooting For more information about troubleshooting in the app, see the relevant chapter in the PowerMic Mobile User Guide. Nuance Healthcare Solutions, a technical support and solution support center, provides technical support to PowerMic Mobile customers during the life of the PowerMic Mobile Service Agreement. The authorized contact (registration required) must submit an online support application from our Nuance Health Support website. Telephone support is recommended for emergency care (24x7) and follow-up or existing support cases created through our Nuance Health Support Platform web page. On-site service for this product is not available. Online-registered Support Platform customers have access to Knowledge Base solutions, as well as the ability to submit online support applications. Average response time on the web Cases is four (4) hours in normal working hours, from 8:00 a.m. to 8:00 pm EST, Monday to Friday. Sign in with nuance Healthcare's health support id and password. On the homepage, click on the Contact support option and then select Contact Dragon Medical Support. On contact Dragon's Medical Support page, select The Type and Urgency of the Case, enter the topic of your case in the Topic field. Select Dragon Medical One (DMO) as a product and then enter a description of your problem in the description box. Click Confirm as soon as you have entered all the necessary fields to create your case. Apps, such as log files or error image files, can also be added to the case details screen using the Post section on the right side of the screen. For further help, please note the case number presented. Telephone support is recommended for emergency care (24x7) and follow-or-escalate existing support cases created through our Nuance Health Support Platform web page. Call the Nuance Health Solutions Support Center at 800-833-7776. For hire, say: Dragon Medical Support. Your call will be answered by the next available support engineer. If you are monitoring an existing support case, provide your support case number to the support engineer so they can access the support corps to continue providing assistance. If this is a new support example, be prepared to provide your customer account number to a support engineer, who will then check your client, authorized contact, and contract information, and open a new support case. Nuance Healthcare Solutions Support Center will support products to authorized contacts of PowerMic Mobile customers during the duration of the PowerMic Mobile Service Agreement. The customer is responsible for registering, through our Nuance Health Support Platform, two (2) trained authorized contacts, to the customer's website who can contact the Nuance Healthcare Solutions Support Center for technical support for the PowerMic Mobile solution. Trained authorized contacts are defined as customers with a reasonable level of operational competence with the PowerMic Mobile solution. This can be achieved by reviewing the documentation of the PowerMic Mobile product or the practical experience of the product. A client's website is defined as any physical location or organizational organization that requires separate administration in a customer environment. Registered nuance Health Support Platform customers have access to Knowledge Base solutions as well as the ability to submit online support applications. Registration of authorized contacts to register an authorized contact, please email to activate the Nuance Healthcare support platform account. You will need to provide the following information in an email request. Subject: Nuance Nuance Health Support Platform Account Request Email Body: The name of your company Oracle customer account number - Located in your PowerMic Mobile Welcome Kit. Product Name - Enter Dragon Medical One for product name. Contact information - Name, phone number and email address of each authorized contact for registration. When your account is activated, you will receive an email containing the accounts of the Nuance Healthcare Platform support platform. You can then log in to your account and use the site's features. It can take up to one (1) day to process claims. If immediate support is needed during the approval process, please use the telephone support procedure. Procedures.
